

Amendments to the Claims:

This listing of claims replaces all prior listings, and versions, of claims in the present application.

Listing of Claims:

1. (Currently Amended) A communication device including a messaging user interface, the interface ~~including means being configured for:~~ selecting a component for inclusion in a message, ~~means for selecting at least one of time, date, and location conditions under which the~~ message may be opened by a device of a recipient, and ~~means for storing said component as a~~ message together with a message header holding the ~~at least one of time, date, and location~~ conditions under which the message may be opened by the device of the recipient in a memory of the communication device.
2. (Previously Presented) A device as claimed in Claim 1, in which the message header further contains information descriptive of content of the message.
3. (Canceled)
4. (Canceled)
5. (Original) A device as claimed in Claim 1, wherein the message includes a plurality of components and associated presentation files.
6. (Original) A device as claimed in Claim 1, in which at least one component is a multimedia file.
7. (Currently Amended) A device as claimed Claim 1, ~~including means wherein the~~ device is configured for creating a presentation file associated with said component, said file

being stored with said message.

8. (Previously Presented) A device as claimed in Claim 7, wherein the presentation file contains parameters relating to size and position of a component comprising a video image.

9. (Previously Presented) A device as claimed in Claim 7, wherein the presentation file contains parameters relating to a volume of a component comprising an audio recording.

10. (Previously Presented) A device as claimed in Claim 7, wherein the presentation file contains parameters relating to a color and a font of a component comprising a text string.

11. (Currently Amended) A device as claimed in Claim 1, including means wherein the device is configured for formatting the message as an attachment to a short text message.

12. (Currently Amended) A device as claimed in Claim 1, including means wherein the device is configured for formatting the message as an email.

13. (Original) A device as claimed Claim 1, including wireless network interface means.

14. (Original) A device as claimed in Claim 1, wherein the device is a radio telephone.

15-22. (Canceled)

23. (New) A method comprising:

selecting a component for inclusion in a message at a communication device;
selecting location conditions under which the message may be opened by a device of a

recipient; and

storing said component as a message together with a message header holding the location conditions under which the message may be opened by the device of the recipient in a memory of the communication device.

24. (New) The method of Claim 23, further comprising creating a presentation file associated with said component, and storing said presentation file with said message.

25. (New) The method of Claim 24, wherein creating the presentation file comprises creating a file including parameters relating to size and position of a component comprising a video image.

26. (New) The method of Claim 24, wherein creating the presentation file comprises creating a file including parameters relating to a volume of a component comprising an audio recording.

27. (New) The method of Claim 24, wherein creating the presentation file comprises creating a file including parameters relating to a color and a font of a component comprising a text string.

28. (New) The method of Claim 23, further comprising formatting the message as an attachment to a short text message.

29. (New) The method of Claim 23, further comprising formatting the message as an email.
